INTERESTS

■ Open Source
■ AI/ML Integration
■ Cloud Architecture
■ System Design

PROFILE

Results-driven Full Stack Developer specialising in the MERN stack with hands-on experience building scalable RESTful APIs, role-based access control systems, and production-ready web applications. Proficient in Node.js, Express.js, React.js, Next.js, TypeScript, MongoDB, and MySQL. Proven ability to design secure authentication flows, optimise database performance, and integrate third-party services. Committed to writing clean, maintainable code and delivering impactful software solutions across diverse industries.

WORK EXPERIENCE

CodeHub, Sadiqabad, Pakistan

June 2025 – September 2025

Frontend Developer Intern

- Designed and delivered 15+ responsive, production-grade web interfaces using React.js and Tailwind CSS, improving cross-device consistency and reducing UI defects.
- Collaborated with a 6-member agile engineering team to maintain and refactor an existing React.js codebase, accelerating feature delivery by streamlining component reuse.
- Contributed to 3 backend API endpoints using Express.js, strengthening full-stack development proficiency.
- Participated in sprint planning, daily stand-ups, and peer code reviews, consistently meeting sprint deadlines.

PROJECTS

Nexus Logistic – Transport Management System

Node.js · Express.js · React.js · TypeScript · MongoDB · Helmet.js

■ github.com/ahmad12-ui/Truck-Full_Stack_Software

- Architected a full-stack logistics SaaS platform with a 3-tier RBAC system (admin, manager, driver) and secure JWT-authenticated RESTful APIs.
- Engineered Helmet.js security headers and centralised MVC error handling for a hardened server layer.
- Built an animated React.js + TypeScript frontend with Framer Motion and React Query, reducing redundant API calls.
- Planned AI-powered route optimisation with distance calculation, fuel modelling, and real-time WebSocket fleet tracking.

MegaCollection – E-Commerce Footwear Store

Next.js 14 · TypeScript · Framer Motion · Chart.js · Vercel

■ mega-collection.vercel.app

- Built and deployed a production storefront on Vercel using Next.js SSR/SSG for fast page loads and strong SEO.
- Implemented secure admin authentication and a Chart.js analytics dashboard for real-time sales and inventory monitoring.
- Designed a WhatsApp-integrated ordering workflow that auto-generates pre-filled order messages.

VideoHub – YouTube-Like REST API Backend

Node.js · Express.js · MongoDB · JWT · Cloudinary · MVC

- Developed a production-grade video-sharing REST API supporting upload, likes, subscriptions, comments, and channel management secured with JWT and Cloudinary.
- Applied MVC design pattern with request validation middleware and centralised async error handling.

Realtime Chat App & Book Reading/Reviews App

React.js · AppWrite BaaS · Redux Toolkit · WebSockets

- Built a WebSocket-powered real-time messaging app using AppWrite BaaS and Redux Toolkit for predictable state management.
- Created a full-featured book reading and review platform enabling reading progress tracking and structured reviews.

EDUCATION

Bachelor of Science in Software Engineering

Expected: May 2027

University of Agriculture, Faisalabad, Pakistan

CGPA: 3.73 / 4.0 — Top Academic Standing
